AWWA Announces Water Resource Strategies for Climate Change & Shortages Webcast

(DENVER, CO) – On Wednesday, March 31, the American Water Works Association (AWWA) will host the Water Resource Strategies for Climate Change & Shortages webcast. The webcast will describe the impact of climate change on a groundwater supply, predicted shortages for a surface water reservoir, and how sustainability principles can be incorporated into water planning.

Webcast attendees will learn how to compare water supply options using triple-bottom-line methods, examine broad-based water resource opportunities, interpret potential groundwater water supply impacts resulting from changes in climate, and more.

Webcast presenters include:

- Frederick Bloetscher, PhD, PE, Assistant Professor, Florida Atlantic University
- Dan Rodrigo, Vice President, CDM
- Rafael E. Frias III, PE, Black & Veatch

For more information on webcasts and registration details, go to www.awwa.org/Education/webcasts.

###

AWWA is the authoritative resource for knowledge, information, and advocacy to improve the quality and supply of water in North America and beyond. AWWA is the largest organization of water professionals in the world. AWWA advances public health, safety and welfare by uniting the efforts of the full spectrum of the entire water community. Through our collective strength we become better stewards of water for the greatest good of the people and the environment.
