AWWA Announces Co-Location of 2010 Distribution Systems Symposium and Exposition with Water Security Congress *Registration Now Open*

(DENVER, CO) – The [American Water Works Association](http://www.awwa.org) (AWWA) announced today that both the 2010 Distribution Systems Symposium and Exposition (DSS) and Water Security Congress will be located in National Harbor, Maryland on September 19–22. This co-location will provide attendees, speakers, and exhibitors two events for the price of one.

"We are thrilled to offer our conference attendees this opportunity to attend both conferences. DSS and the Water Security Congress both offer educational and professional opportunities that are crucial to the work done by members of the water community," said AWWA Executive Director David LaFrance.

Each event will have distinct technical programs open to attendees of either conference at no additional cost, offering a more diverse and rounded educational opportunity. In addition, the shared exhibit hall will represent products and service providers from distribution and security, providing a unique opportunity for networking and purchasing.

For more than 30 years, DSS has brought together decision makers and key influencers involved in water distribution, and Water Security Congress is the event for water security and emergency preparedness professionals.

Each year, the AWWA Water Security Congress draws water industry professionals who want up-to-date information on innovative products and services for protecting water and wastewater infrastructures in order to prepare for new and emerging water security challenges.

Professionals including distribution specialists, managers, designers and engineers, project/program managers, operators, executive management, and utility security specialists are all encouraged to attend.

For more information on webcasts and registration details, please visit www.awwa.org/dsswsc.
