

## About the Water Research Foundation

The Water Research Foundation is a member-supported, international, 501(c)3 nonprofit organization that sponsors research that enables water utilities, public health agencies, and other professionals to provide safe and affordable drinking water to consumers.

The Foundation's mission is to advance the science of water to improve the quality of life. To achieve this mission, the Foundation sponsors studies on all aspects of drinking water, including resources, treatment, and distribution. Nearly 1,000 water utilities, consulting firms, and manufacturers in North America and abroad contribute subscription payments to support the Foundation's work. Additional funding comes from collaborative partnerships with other national and international organizations and the U.S. federal government, allowing for resources to be leveraged, expertise to be shared, and broad-based knowledge to be developed and disseminated.

From its headquarters in Denver, Colorado, the Foundation's staff directs and supports the efforts of more than 800 volunteers who serve on the board of trustees and various committees. These volunteers represent many facets of the water industry, and contribute their expertise to select and monitor research studies that benefit the entire drinking water community.

Research results are disseminated through a number of channels, including reports, the Website, Webcasts, workshops, and periodicals.

The Foundation serves as a cooperative program providing subscribers the opportunity to pool their resources and build upon each others' expertise. By applying Foundation research findings, subscribers can save substantial costs and stay on the leading edge of drinking water science and technology. Since its inception, the Foundation has supplied the water community with more than \$460 million in applied research value.

More information about the Foundation and how to become a subscriber is available at [www.WaterRF.org](http://www.WaterRF.org).

# CONTENTS

LIST OF TABLES .....	xiii
LIST OF FIGURES .....	xvii
FOREWORD .....	xxxv
ACKNOWLEDGMENTS .....	xxxvii
EXECUTIVE SUMMARY .....	xxxix
CHAPTER 1: INTRODUCTION .....	1
Issues .....	2
Design UVT and Flow Rate .....	2
Lamp Aging and Fouling .....	3
UV Dose Monitoring .....	4
UV Dose Pacing .....	6
Uncertainty of UV Sensors and UVT Monitors .....	7
Lamp Breakage .....	8
CHAPTER 2: PROJECT APPROACH .....	9
Literature Review .....	10
Identify Research Questions .....	10
Develop Surveys and Database .....	10
Initial Data Collection .....	14
Develop Onsite Test Plans .....	15
Phase 1 QA/QC Review .....	15
Site Evaluations .....	15
Evaluation of Mercury Release and Control .....	16
Database Analysis Tool Development .....	16
Internet Survey Tool Development .....	17
Utility Contact Plan .....	17
Phase 2 QA/QC Review .....	18
Survey UV Installations .....	18
Analysis, Recommendations, and Reporting .....	18
CHAPTER 3: LITERATURE REVIEW .....	19
Fundamental Aspects of UV Light .....	20
Nature of UV Light .....	20
Mechanisms of UV Light Generation .....	21
Gas Discharges .....	21
Mercury Discharges .....	22
Propagation of UV Light .....	23
Mechanisms of Microbial Inactivation by UV Light .....	30

Microbial Response to UV Light.....	30
Microbe Reactivation.....	32
UV Dose-Response.....	35
Impact of UV Wavelength.....	42
UV Dose-Response of Differing Microbes.....	44
UV Reactors.....	49
UV Lamps.....	49
Other UV Sources.....	62
Measurement of UV Lamp Output.....	62
Lamp Sleeves.....	63
Cleaning Mechanisms.....	65
UV Sensors.....	66
UVT Monitors.....	69
Other Sensors.....	69
Reactor Configuration.....	70
Reactor Performance.....	71
UV Dose Delivery.....	71
UV Dose Monitoring.....	74
Reactor Validation.....	76
Water Quality Impacts on UV Disinfection.....	78
Algae Growth.....	83
Disinfection Byproducts.....	83
Mechanisms of DBP Formation.....	83
Specific UV Disinfection DBPs.....	84
Computational Fluid Dynamic Modeling.....	87
CHAPTER 4: ANALYSIS OF UV DISINFECTION KNOWLEDGE BASE DATA.....	89
Geographic Distribution of UV Systems in North America.....	90
Distribution of UV Systems by UV Vendor.....	95
UV Reactor Products.....	97
Distribution of UV Systems by Source Water Type.....	104
UV System Locations.....	106
UV System Treatment Objectives.....	110
UV System Design Criteria.....	111
Headloss and Pumping.....	120
UV Lamps.....	123
Quartz Sleeves.....	128
Lamp Ballasts.....	132
Cleaning Systems.....	136
Duty and Reference UV Sensors.....	142
Flowmeters and UVT Monitors.....	154
Power Consumption and Backup Power.....	160
Regulations.....	164
Validation.....	169
Design.....	173
Mercury Loss/Breakage Response.....	178

Operation and Maintenance .....	180
Lessons Learned and Recommendations .....	188
Design .....	193
Procurement .....	193
Regulatory .....	193
Validation .....	193
Instrumentation and Control .....	194
Training .....	194
Startup .....	194
Operation .....	195
Maintenance .....	195
Benefits .....	196
 CHAPTER 5: EVALUATION OF INSTALLED UV SYSTEMS .....	 197
Poughkeepsie, New York .....	199
Test Plan and Issues .....	199
Issues with Advanced Oxidation .....	201
Power Consumption .....	201
Reactor Turndown .....	202
UV Sensor Readings .....	203
UV Sensor Variability .....	204
Characterization of Measured and Displayed UV Intensity .....	206
Dry UV Sensor Retrofit .....	213
UV Dose Monitoring .....	214
Lamp and Sleeve Replacement .....	218
Lamp Wire Orientation .....	221
Evaluation of Sleeve Fouling .....	223
On-line UVT Monitor .....	227
Long-Term Performance of the On-Line UVT Monitor .....	231
Laboratory UV Spectrophotometer .....	231
Long-Term Lamp Aging and Sleeve Fouling Study .....	233
Summary of Key Findings .....	238
Capital Regional District, Victoria, British Columbia .....	239
Test Plan and Issues .....	241
Power Consumption .....	242
UV Dose Delivery and Turndown .....	242
Characterization of UV Sensor Readings .....	246
Determination of Dose Monitoring Algorithm .....	249
On-Line UVT Monitor .....	250
Evaluation of Lamp Aging and Quartz Sleeve Fouling .....	253
Long-Term CAF Evaluation .....	254
Lamp Failure .....	255
Reference and Duty UV Sensor Checks .....	257
Mercury Release and Containment .....	258
Summary of Key Findings .....	258

City of Lethbridge, Alberta.....	261
Test Plan and Issues .....	262
Power Consumption.....	262
Reactor Turndown and Flow Splitting.....	264
UV Sensor Readings.....	264
Evaluation of Dose Monitoring Algorithm.....	264
On-Line UVT Monitor.....	268
Evaluation of Lamp Aging and Quartz Sleeve Fouling.....	268
Lamp Failure.....	270
Reference and Duty UV Sensor Checks .....	271
Comparison of Laboratory Spectrophotometer with Calibrated Spectrophotometer .....	273
Mercury Release and Containment.....	273
Summary of Key Findings .....	274
Epcor, City of Edmonton, Alberta .....	274
Test Plan and Issues .....	275
Power Consumption.....	275
UV Sensor Readings.....	277
Evaluation of UV Dose Monitoring Algorithm.....	280
Evaluation of Lamp Aging and Quartz Sleeve Fouling.....	281
UV Sensor Port Fouling.....	282
Long-Term Fouling Study .....	286
Reference and Duty UV Sensor Checks .....	288
Comparison of Laboratory Spectrophotometer with Calibrated Spectrophotometer .....	290
Mercury Release and Containment.....	290
Summary of Key Findings .....	290
Lake Havasu, Arizona.....	291
Test Plan and Issues .....	293
Power Consumption.....	294
UV Sensor Readings and Dose Calculation.....	295
Lamp Aging and Sleeve/Sensor Port Fouling.....	298
Evaluation of Reactor Cleaning .....	303
Lamp Aging .....	305
Reference UV Sensor Checks.....	307
Summary of Key Findings .....	307
Recommendations.....	309
City of Tempe, Arizona .....	309
Test Plan and Issues .....	309
Power Consumption.....	311
UV Sensor Readings and Dose Calculations .....	313
Sleeve and UV Sensor Port Window Fouling.....	316
Long-Term CAF Analysis .....	319
On-Line UVT Monitor.....	322
Reference UV Sensor Checks.....	325
Evaluation of UV Sensor Using the Optics Bench .....	327

Evaluation of the UV Sensor Board Circuitry .....	328
Evaluation of the Laboratory Spectrophotometer .....	328
Summary of Key Findings .....	330
Weber Basin Water Conservancy District, Utah .....	332
Test Plan and Issues .....	332
Power Consumption.....	332
UV Sensor Readings and Dose Pacing .....	334
Long-Term Monitoring of Dose Pacing and CAF.....	336
Sleeve and UV Sensor Port Fouling .....	338
Lamp Failure.....	339
Reference UV Sensor Checks.....	340
On-Line UVT Monitor.....	341
Summary of Key Findings .....	341
Neenah Water Treatment Plant, Neenah Wisconsin.....	342
Test Plan and Issues .....	342
Power Consumption.....	344
Laboratory UV Spectrophotometer Operation.....	345
On-Line UVT Monitor.....	345
Quartz Sleeve Fouling.....	348
Reference UV Sensor Checks.....	350
Summary of Key Findings .....	350
 CHAPTER 6: UV SYSTEM MAINTENANCE AND TROUBLESHOOTING GUIDE .....	 351
Introduction.....	351
Overview of UV System Operation.....	351
Mode of Operation .....	352
UV Dose Delivery.....	352
UVT .....	353
Flow .....	356
UV Sensor Failure.....	356
UV Reactor Startup.....	357
Back-up Chemical Disinfection.....	357
UV System Evaluations .....	357
Online UVT Monitor Calibration Check .....	357
Reference UV Sensor Check .....	358
UV Sensor Linearity/Sensor Saturation.....	362
UV Sensor-to-Sensor Variability .....	362
Lamp Variability Testing.....	363
Quantifying Lamp Aging and Fouling Using the CAF Index .....	364
Dependence of UV Sensor Readings on UVT and Ballast Power.....	365
Measurement of Power Consumption.....	368
Evaluation of UV Dose Delivery and Monitoring.....	368

CHAPTER 7: MERCURY RELEASE WITH UV LAMP BREAKS.....	371
Introduction.....	371
Background.....	371
Methods and Materials.....	372
UV Reactor .....	372
Water Treatment and Clean-up Protocol .....	377
Results and Analysis.....	378
Amalgam LPHO Lamp Breakage Studies .....	378
Medium Pressure Lamp Breakage Studies .....	383
Lamp and Sleeve Quartz Recovery.....	387
Conclusions.....	387
 CHAPTER 8: ENGINEERED SOLUTIONS AND RESPONSE PLANS .....	 391
Introduction.....	391
Prevention of Lamp and Sleeve Breaks .....	391
Mechanical Failure of Quartz Sleeves .....	394
Bending Moments and Stresses .....	394
Stress Caused by Internal and External Pressures .....	398
Vortex Shedding and Resonant Vibration .....	399
Example Calculations .....	400
Detection of Lamp and Sleeve Breaks.....	403
Mercury Release and Transport.....	406
Mass of Mercury Released.....	406
Mercury Transport after a Breakage Event.....	408
Water Hammer.....	414
Water Hammer Equations.....	414
Water Hammer Simulations.....	420
Containment.....	426
Flow Diversion.....	428
Settling Basins .....	428
Water Sampling .....	431
Sample Collection and Analytical Methods .....	432
Cleanup and Treatment.....	433
Mercury Discharge Limits .....	433
Response Plans.....	434
Treatment Options .....	434
Exposure Safety .....	435
Case Studies.....	435
Case Study 1 .....	435
Case Study 2 .....	443
Conclusions.....	449
 CHAPTER 9: PROJECT SUMMARY.....	 451
Summary of Survey Data.....	451
UV Design Criteria .....	451
UV System Components.....	452

Regulations and Validation.....	454
Design .....	455
Operations and Maintenance.....	455
Lessons Learned and Recommendations .....	456
Summary of Installed UV System Evaluations .....	457
UV Dose Monitoring .....	457
UV Dose Pacing and Power Consumption .....	458
Lamp Aging and Fouling .....	458
Combined Lamp Aging and Fouling (CAF) Index.....	459
UVT Monitors.....	460
UV Sensors .....	460
Other .....	461
Summary of Mercury Mitigation Study.....	461
Pilot Study Findings.....	461
Mitigating Mercury Release .....	462
