Membrane technology on the forefront

Membrane technology is evolving with new system designs for enhanced recovery. Improvements in membranes have lowered energy consumption and reduced fouling possibilities. As more facilities are in operation, everyone can benefit from lessons learned over the years.

Cactus League Spring Training

Cactus League Spring Training, a seasonal rite in Greater Phoenix, takes place every February and March with the iconic sounds of cracking bats, snapping mitts and happy fans. Eleven major league teams play more than 300 games across Greater Phoenix, with no two ballparks more than a 45-minute drive from each other. The 2020 MTC falls near the end of the League. Join us to experience this one-of-a-kind Arizona experience for yourself!

EXPOSITION

The MTC Exhibit Hall showcases the latest developments from the leading membrane technology companies. Enhance your conference experience by exploring full booth displays highlighting what is new on the horizon and finding solutions to today’s most pressing issues. Join us for Exhibit Hall Education Sessions taking place throughout the conference!
