Added to Foreword at the end of II.B. Filter Media the following statement:

If questions arise regarding the silicon dioxide content of silica sand, the content can be determined using ASTM C114-15 Standard Test Method for Chemical Analysis of Hydraulic Cement. The result can be reported as percent silicon dioxide.

**Sec 4.2 Chemical Requirements (should read)**

Sec. 4.2.1 Filter media

4.2.1.1 Silica sand. The silicon dioxide content of silica sand shall be at least 85 percent.
