Contents

Preface **xv**

Chapter 1 Introduction **1-1**

1.0 Chapter 2—Planning Indirect Potable Reuse 1-2
1.1 Integrated Water Resources Management 1-3
1.2 Means of Introducing Reclaimed Water to Water Supplies 1-3
1.3 Institutional Considerations 1-4
1.4 Economics 1-4
2.0 Chapter 3—Health and Regulatory Considerations 1-4
2.1 Health Issues—Microorganisms 1-5
2.2 Chemical Constituents 1-6
2.3 Health and Regulatory Challenges 1-6
3.0 Chapter 4—Treatment Technology 1-7
3.1 Advanced Treatment 1-7
3.2 Natural Treatment Systems 1-9
3.3 Disinfection 1-10
3.4 Treatment Challenges 1-11
4.0 Chapter 5—System Reliability 1-11
4.1 Reliable Design and Operations 1-11
4.2 Ensuring Water Quality 1-14
5.0 Chapter 6—Addressing Public Perceptions 1-15

Chapter 2 Planning Indirect Potable Reuse **2-1**

1.0 Introduction 2-2
2.0 Integrated Water Resources Planning 2-3
3.0 Means of Introducing Reclaimed Water to Potable Water Supplies 2-4
3.1 Groundwater Recharge 2-5
3.2 Existing Groundwater Recharge Facilities 2-10
3.3 Surface Water Augmentation 2-10
3.3.1 Locations of the Delivery and Intake Points 2-10
3.3.2 Volume of Water To Be Reused 2-12
3.3.3 Character of Watershed 2-13

4.0 Regulations 2-13
4.1 Federal Regulations 2-13
4.2 State Regulations 2-15
4.3 Water Rights 2-15
4.3.1 Surface Water Doctrines 2-16
4.3.1.1 Appropriation Doctrine 2-16
4.3.1.2 Riparian Doctrine 2-17
4.3.1.3 Mixed or Hybrid Doctrines 2-17
4.3.2 Pueblo Rights 2-17
4.3.3 Groundwater Doctrines 2-18
5.0 Economics 2-18
5.1 Water-Quality Goals 2-18
5.2 Treatment Requirements 2-19
5.3 Costs of Facilities 2-20
6.0 Public Participation and Acceptance 2-20
7.0 References 2-22
8.0 Suggested Readings 2-23

Chapter 3 Health and Regulatory Considerations 3-1

1.0 Introduction 3-2
2.0 Health Issues 3-3
2.1 Microorganisms 3-3
2.1.1 Bacterial Pathogens 3-5
2.1.2 Protozoan Parasites 3-5
2.1.3 Viral Pathogens 3-6
2.2 Waterborne Illness 3-7
2.3 Chemical Constituents 3-9
2.3.1 Inorganics 3-10
2.3.2 Radionuclides 3-11
2.3.3 Organics 3-11
2.3.4 Microconstituents 3-13
2.4 Health-Effects Studies 3-16
2.5 Methods To Assess Health Effects and Relative Risk 3-9
2.5.1 Epidemiologic Investigations 3-9
2.5.1.1 Ecologic Studies 3-20
2.5.1.2 Surveillance Studies 3-21
2.5.1.3 Case-Control Studies 3-21
2.5.1.4 Cohort Studies 3-22
2.5.2 Chemical Risk Assessment 3-23
2.5.3 Microbial Risk Assessment 3-25

3.0 Water Quality Issues 3-26
3.1 Water Quality Standards 3-26
3.2 Discharge Permits 3-29
3.3 Total Maximum Daily Loads 3-31
3.4 Enforcement 3-32
4.0 Other Regulatory/Statutory Issues 3-32
4.1 Water Rights 3-32
4.1.1 Texas 3-32
4.1.2 California 3-33
4.2 Endangered and Threatened Species 3-33
5.0 State Regulations and Guidelines for Indirect Potable Reuse 3-34
5.1 Regulations for Injection Wells 3-34
5.2 State Regulations/Guidelines 3-35
5.2.1 California 3-35
5.2.2 Florida 3-37
5.2.3 Hawaii 3-40
5.2.4 Idaho 3-40
5.2.5 Washington 3-41
5.3 What To Do in the Absence of State Regulations/Guidelines 3-41
5.3.1 Arizona 3-42
5.3.2 Texas 3-44
5.3.3 U.S. Environmental Protection Agency Guidelines 3-45
6.0 Recommendations 3-45
7.0 References 3-50
8.0 Suggested Readings 3-60

Chapter 4 Treatment Technology 4-1

1.0 Introduction 4-2
2.0 Advanced Treatment 4-3
2.1 Biological and Chemical Nutrient Removal 4-5
2.2 Coagulation/Flocculation and Solid–Liquid Separation 4-7
2.3 Microfiltration and Ultrafiltration 4-8
2.4 Ion Exchange 4-9
2.5 Electrodialysis and Electrodialysis Reversal 4-10
2.6 Reverse Osmosis and Nanofiltration 4-11
2.7 Chemical Oxidation 4-14
2.8 Advanced Oxidation Processes 4-15

2.9 Activated Carbon Adsorption 4-16
2.10 Air Stripping 4-17
3.0 Natural Treatment Systems 4-18
3.1 Constructed Wetlands 4-18
3.2 Soil–Aquifer Treatment 4-19
3.3 Riverbank Filtration 4-22
4.0 Disinfection 4-24
4.1 Chlorination 4-24
4.2 Ozone Disinfection 4-25
4.3 Ultraviolet Irradiation 4-26
5.0 Treatment Trains 4-27
6.0 Capital and Operating Costs 4-27
7.0 Summary 4-29
8.0 References 4-29
9.0 Suggested Readings 4-31

Chapter 5 System Reliability 5-1

1.0 Introduction 5-2
2.0 Reliable Design and Operations 5-2
2.1 Treatment Facilities 5-2
2.1.1 Process and Equipment Redundancy 5-3
2.1.2 Piping and Pumping Flexibility 5-5
2.1.3 Disinfection 5-5
2.2 Emergency Storage or Discharge 5-6
2.3 Transmission and Conveyance 5-9
2.4 Reuse Facilities 5-9
2.4.1 Groundwater Recharge 5-9
2.4.2 Recharge System Reliability 5-10
2.4.3 Surface Water Replenishment 5-10
2.5 Instrumentation, Controls, and Alarms 5-10
2.6 Power Supply 5-11
2.7 Operations 5-12
2.7.1 Standard Operating Procedures 5-13
2.7.2 Cross-Training 5-15
2.7.3 Emergency Response 5-16
3.0 Ensuring Water Quality 5-17
3.1 Regulatory and Performance Compliance 5-17
3.2 Performance Contingencies 5-20
3.3 Contingency Planning 5-21
4.0 Regulator Participation 5-22
4.1 Project Development Phase 5-22

4.2 Implementation Phase—Design and Construction 5-23
4.3 Initial Startup and Operation and Maintenance 5-24
5.0 References 5-25

Chapter 6 Addressing Public Perceptions 6-1

1.0 Introduction 6-3
1.1 Creates a New Source of High-Quality Water 6-3
1.2 Improves Drought Resiliency 6-4
1.3 Maximizes the Value of Water Storage Assets 6-4
1.4 Enhances Water Quality 6-4
1.5 Is Financially Compelling 6-4
2.0 Goals of Outreach Programs 6-4
3.0 Important Issues To Address 6-5
3.1 The Problem 6-5
3.2 The Source of Water Quality 6-6
3.3 Conflict 6-7
3.4 Politics 6-7
4.0 Perception, Risk, and Branding 6-7
4.1 Risk 6-8
4.2 Trust 6-8
4.3 Brands and Branding 6-8
5.0 Trust-Building Strategies for Water Utilities 6-9
5.1 Treat Audiences as Shareholders and Investors 6-9
5.2 Invest in Water Reliability 6-10
5.3 Create Water-Quality Confidence 6-10
5.3.1 Improve the Situation 6-11
5.3.2 Use Common Sense 6-11
5.3.3 Manage Risk 6-11
5.3.4 Be the Source of Information 6-11
5.4 Turn Conflict and Opposition Into Assets 6-11
5.4.1 Lead a Meaningful Community Dialogue 6-12
5.4.2 Listen and Embrace Differing Points of View 6-12
5.4.3 Assess the Community With Respect To Conflict 6-12
5.4.4 Develop Relationships With Opponents 6-12
5.5 Ensure a Good Policy Decision 6-13
5.5.1 Understand and Support Policy Makers 6-13
5.5.2 Focus on Developing Specific Relationships 6-13
5.5.3 Communicate With Purpose and Diligence 6-14

6.0 Summary of Project Case Studies 6-15
6.1 Investing in Water Reliability 6-15
6.1.1 Water Resources Recovery Project (Tampa, Florida) 6-15
6.1.2 Water Repurification Project (San Diego, California) 6-16
6.1.3 Clean Water Revival Project (Dublin San Ramon, California) 6-16
6.1.4 Water Campus (Scottsdale, Arizona) 6-16
6.1.5 Groundwater Replenishment System (Orange County, California) 6-17
6.2 Creating Water-Quality Confidence 6-17
6.2.1 Water Repurification Project (San Diego, California) 6-18
6.2.2 Clean Water Revival Project (Dublin San Ramon, California) 6-18
6.2.3 Water Resources Recovery Project (Tampa, Florida) 6-18
6.2.4 Water Campus (Scottsdale, Arizona) 6-19
6.2.5 Groundwater Replenishment System (Orange County, California) 6-19
6.2.6 Upper Occoquan Sewage Authority (Virginia) 6-20
6.3 Turning Conflict and Opposition Into Assets 6-20
6.3.1 Water Repurification Project (San Diego, California) 6-20
6.3.2 Upper Occoquan Sewage Authority (Virginia) 6-21
6.3.3 Water Campus (Scottsdale, Arizona) 6-21
6.3.4 Clean Water Revival Project (Dublin San Ramon, California) 6-21
6.3.5 Groundwater Replenishment System (Orange County, California) 6-22
6.4 Ensuring a Good Policy Decision 6-22
6.4.1 Groundwater Replenishment System (Orange County, California) 6-22
6.4.2 Water Campus (Scottsdale, Arizona) 6-23
6.4.3 Water Repurification Project (San Diego, California) 6-23
6.4.4 Clean Water Revival Project (Dublin San Ramon, California) 6-24

6.5 Insights From Other Case Studies 6-24
6.5.1 San Gabriel Valley Recharge Project 6-25
6.5.2 East Valley Project (Los Angeles Department of Water and Power) 6-25
6.5.3 Australia (2006–2007) 6-25
7.0 Watershed Differences That Affect Public Perceptions 6-26
7.1 Dry or Wet Climates 6-26
7.2 Coastal Versus Inland Communities 6-26
8.0 Timeline for Implementing an Indirect Potable Reuse Project 6-27
8.1 Years 1 and 2—Laying a Foundation 6-27
8.2 Years 3 and 4—Building Relationships and Support 6-27
8.3 Years 5 and 6—Designing and Communicating 6-28
8.4 Years 7 and 8—Constructing and Communicating 6-28
9.0 Conclusions 6-28
10.0 Reference 6-28

Index I-1
